# TRAILER #1 — FILM #2 — BOARD (step 1: board + quote, nothing built)

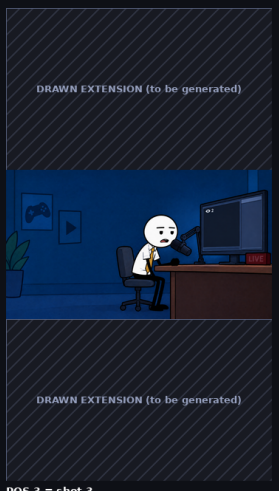

9:16, 1080x1920. Original 16:9 frame placed full-width, pixel-exact, centered (nothing cropped). Hatched zones = the NEW art to be drawn above and below. Hatch is a placeholder, not art.
Source: v3 master (544.8 s). Excerpt = positions 1-9, 0.000-42.465 s, audio as performed.

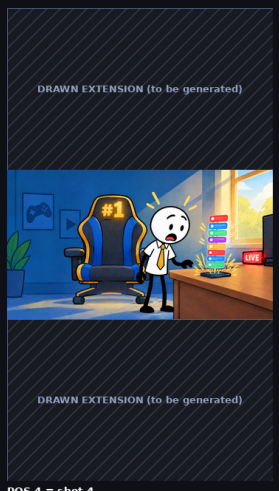

**POS 1 = shot 1 (thumbnail frame)**
0.00-2.74 s
"You became the #1 streamer overnight."
Extend: Crown + spotlight cone run up into a dark ceiling; light pool continues on the floor below. Desk side runs down to floor.

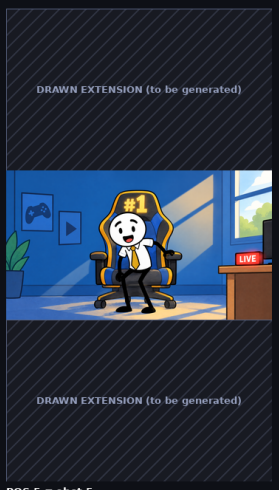

**POS 2 = shot 2**
2.74-5.66 s
"Yesterday, you streamed to almost nobody."
Extend: Wall above posters; floor below chair. Desk body runs down to floor.

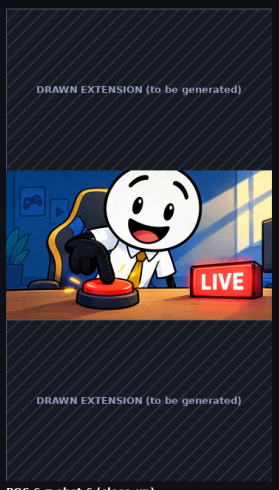

**POS 3 = shot 3**
5.66-9.99 s
"You talked to an empty room..."
Extend: Monitor + mic arm are cut by the top edge; extension must finish the monitor top and the boom arm.

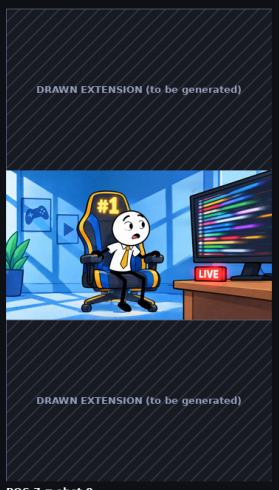

**POS 4 = shot 4**
9.99-13.06 s
"This morning, your phone will not stop buzzing."
Extend: Window is cut at the top; continue frame + sky light. Desk runs down.

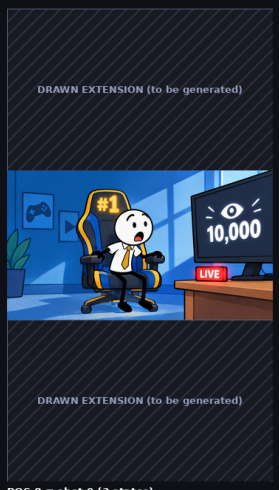

**POS 5 = shot 5**
13.06-16.21 s
"You sit down in the same chair..."
Extend: Same window continuation; wall above plant/posters, floor below chair.

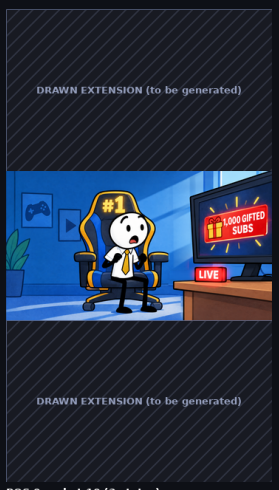

**POS 6 = shot 6 (close-up)**
16.21-19.21 s
"You press one button. The red light turns on."
Extend: HIGHEST RISK: the head is cut by the top edge. Extension must close the head outline above the eyebrows. Desk runs down.

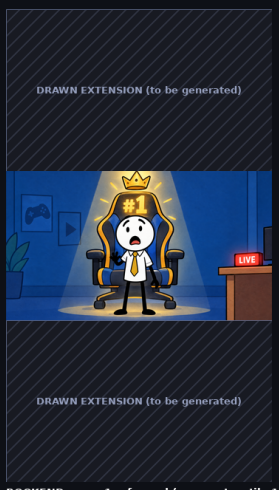

**POS 7 = shot 8**
19.21-25.81 s
"And the room explodes. The chat is moving..."
Extend: Chat monitor is cut at the top: finish the monitor. Window light shafts continue up the wall.

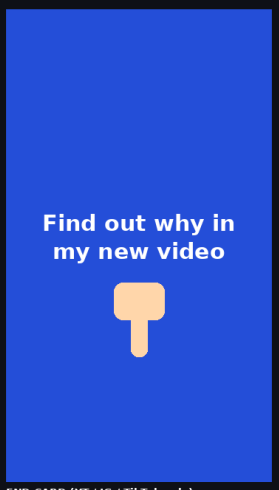

**POS 8 = shot 9 (3 states)**
25.81-36.21 s
"Ten thousand ... fifty thousand ... one hundred thousand..."
Extend: Monitor top finished. Counter states 10,000 / 50,000 / 100,000 are composited on the SAME extended canvas (no extra generation).

**POS 9 = shot 10 (2 states)**
36.21-42.47 s
"Someone gifts you one hundred subscribers. Moments later... a thousand."
Extend: Same extended canvas as pos 8. Banner flips 100 -> 1,000 GIFTED SUBS at 38.95 s. EXCERPT ENDS 42.465 s.

**BOOKEND = pos 1 reframed (same art as tile 1)**
42.47 s -> 0.5 s silence, then new line
"But staying at #1 is just as hard." (new Bram take)
Extend: Reuses the pos 1 extension, no extra generation. Line starts 0.5 s after the frame returns.

**END CARD (YT / IG / TikTok only)**
~2.0 s, silent
"Find out why in my new video [finger-down emoji]"
Extend: Flat royal blue (#244ED8 here; exact blue to confirm), white bold type. Hand shown is a placeholder; the real finger-down emoji is set in the build.

**VERSIONS**

**YouTube / IG / TikTok**
tiles 1-9 -> bookend + line -> end card
~47.3 s

**Facebook**
tiles 1-9 -> bookend + line -> OUT
No end card, nothing after the line.
~45.3 s

**Locked in every tile**
posters left, plant far left,
desk + LIVE + monitor right,
screen designs, chair #1.

Banned: smear, stretch,
blur-fill, slab fill.

**LEGEND**

Extend: Runtimes are estimates until the Bram line is recorded (see quote).

## Trailer #1, Film #2: QUOTE (nothing spent, nothing generated)

Balance 689.01 credits. All prices below are live preflight quotes (get_cost; no job submitted).

| Item | What | Price |
|---|---|---|
| 1. Bram line | "But staying at #1 is just as hard." One take, text2speech_v2 / elevenlabs, preset 549ff70a-3ee7-4f04-a4d9-89a24fab7709 (the same Bram preset as the 51 v3 passages). 7 words, short-line tier. | 0.15 |
| 2. Extensions, pos 1-9 | 9 generations, gpt_image_2_5, 9:16, 2k, medium, one per position. Each gets the original frame placed full-width on the 9:16 canvas as the reference, prompt = continue the room above and below in the film's exact painterly style, locked elements named. 1.00 each. | 9.00 |
| 3. Bookend frame | Reuses the pos 1 extension. No generation. | 0.00 |
| 4. State frames | Pos 8 (50,000, 100,000) and pos 9 (1,000 GIFTED SUBS): the real screen states from the repo are pasted onto the extended base locally. No generation. | 0.00 |
| 5. Pixel-exact original | The original 1920x1080 pixels are pasted back over the generated middle band (about 12 px feathered seam), so the film's art is never regenerated. The generation supplies only the new art above and below. | 0.00 |
| 6. End card | Silent flat royal blue, white type, built locally. | 0.00 |
| TOTAL (expected) | | 9.15 (balance 689.01 -> 679.86) |

**Staging I recommend:** generate pos 1 first (1.00) and approve that single extension as the style proof; then the other 8 (8.00) + the Bram line (0.15). If pos 1 is wrong, only 1.00 is lost.

**Re-rolls:** not included. Each costs 1.00 (frame) or 0.15 (line). Worst case, if every frame needed one re-roll, the ceiling is 18.15. I will not re-roll without your OK.

**Cheaper alternative, not recommended:** the outpaint tool is 2.00 per frame (18.00 for 9) and takes no prompt, so I cannot lock elements or style. Not worth it.

## Runtime

| Segment | Time |
|---|---|
| Excerpt, pos 1-9 (v3 master, frame 0 to cut) | 0:42.465 (42.465 s) |
| Pos 1 2.74 \| 2 2.92 \| 3 4.33 \| 4 3.08 \| 5 3.15 \| 6 3.01 \| 7 6.60 \| 8 10.40 \| 9 6.26 | sums to 42.465 |
| Bookend frame: 0.5 s silence + Bram line (est. 2.0-2.4 s, 7 words) + ~0.1 s tail | about 2.8 s |
| **Facebook version** (ends on the line) | **about 45.3 s** |
| End card (YT / IG / TikTok only) | about 2.0 s |
| **YouTube / IG / TikTok version** | **about 47.3 s** |

Estimates for the new line only; exact runtime is known once it is recorded.

## Cut point (from the v3 forced-alignment timeline, checked against the master)

Position 9 = lines "Someone gifts you one hundred subscribers." and "Moments later you get gifted a thousand subscribers." The last word, "subscribers", ends at 42.375 s. The next word starts at 42.555 s. The cut is at **42.465 s**, the middle of that performed pause, the same place the master cuts to position 10. The 1,000 GIFTED SUBS banner flips at 38.95 s and holds to the cut, so the counter climb is complete. Audio is taken as-is from the v3 master (single loudnorm already applied): no levelling, no re-gapping; only a few-ms fade at the cut to avoid a click.

## Things you should know before approving

1. **The board cannot show the drawn extension art yet.** It needs generations, and you said zero spend before approval. The hatched zones are placeholders. What you are approving now is placement, scale, cut points and plan. The first generation (pos 1, 1.00) is the real look-test.

2. **Scale.** To keep the locked layout (posters, plant, desk, LIVE, monitor) and crop nothing, each 16:9 frame fills the full 1080 px width, 607 px tall, and the rest of the 1920 px height (about 68%) is new art, about 656 px above and below. On screen the film art is 56% of its original size.

3. **Risky frames.** Pos 6: the big head is cut by the top edge, so the extension must close the head outline. Pos 3, 7, 8, 9: the monitor is cut at the top. Pos 4, 5: the window is cut at the top. These are the ones most likely to need a re-roll.

4. **New Bram line level.** The line is a fresh take, so it will not match the master's level. I will give it the one linear gain trim to sit with the master audio (no per-line levelling, no dynamics), and tell you the numbers. Say so if you want it left raw.

5. **End card color.** "Royal blue" drawn here as #244ED8. Tell me if you want an exact hex or one sampled from the film.

6. **Source.** The v3 master and frames live on branch claude/happy-mccarthy-4tfabg (film2-assets/). They are not copied into this branch; only the board and quote are committed here.
