Film #2 — Section 3 'Truth 1: The Money' — storyboard map (shots 58-85)

Locked script and timing report read (film2-assets/voiceover/). VO-074 to VO-104 = 31 lines, 115.58 s, 28 shots. DRAFT: nothing generated, nothing spent.

Locks applied to every shot

Room and desk standard = Section 1 shot 9 (royal blue room, controller picture above play-button picture, plant left, #1 chair center, window + desk right; same monitor and LIVE box size and position). LIVE bright. Only the monitor content and Bram's pose/face change. Face: exactly one eyebrow per eye, head one closed outline. No crown or spotlight (shot 1 only). Text on screen limited to the exact list per shot; every number is copied from the locked script (digits only where the script states the figure). Generic icons only: no real logos, no real likenesses.

Shot	VO	Sec	Type	Line	Monitor content	Bram	Meaning / stakes
58	VO-074	2.19	GEN	Truth number one is about the money.	One big gold coin icon, glowing, centered on the monitor. Nothing else. No text.	Stops celebrating, leans forward, one brow raised per eye, curious.	The tiny line from 53/54 is now the subject: money.
59	VO-075	3.87	GEN	And the money starts with the counter you could not stop watching.	Counter 900,000 with person icon (same as 53). Small gold coins lift off the number and float up.	Hands on armrests, eyes locked on the number, half smile.	Every subscriber on the counter is a coin.
60	VO-076	4.21	GEN	Every single name on that counter pays about six dollars a month.	One person icon with a '$6' tag, in front of a faded crowd of identical person icons. Text: $6	Head tilted, puzzled-curious.	Each name is a payer, not a fan.
61	VO-077-078	4.00	GEN	Six dollars sounds like nothing. It is the price of a coffee.	One coffee-cup icon beside '$6'. Calm and small. Text: $6	Shrugs, relaxed, unimpressed.	Set up the trap: tiny price, so it feels harmless.
62	VO-079	3.79	GEN	But tonight, you are crossing one million of them.	Counter shows 1,000,000 with person icon, glowing. Text: 1,000,000	Eyes wide, brows up, mouth slightly open.	The harmless price is about to be multiplied by a crowd.
63	VO-080-081	3.14	GEN	One million people. Six dollars each.	Left half: crowd icon + 1,000,000. Right half: coin + $6. Big pile of coins between them. Text: 1,000,000 and $6	Eyes up, doing the math in his head.	The multiplication moment.
64	VO-082	3.00	GEN	Now — the website takes its cut first.	Coin pile. A generic website-window icon (no letters, no logo) reaches in and grabs coins off the side.	Suspicious sideways look, brow raised.	Someone is skimming before you see it.
65	VO-083	5.56	GEN	About half of every subscription goes to the platform before it ever reaches you.	One coin split exactly in half. Left half slides to the website-window icon, right half to a small person icon (you). No digits, no %.	Palms up, small wince. (Slow push at assembly.)	Half the money never reaches you.
66	VO-084 + VO-085a	5.03	GEN	And still. The last time a streamer made a run like yours,	Climbing line graph with a small ghost stick-figure at the top (another streamer's run). No text.	Brows up, watching closely. Split point of VO-085 set at assembly.	There is precedent: someone already did this.
67	VO-085b + VO-086	4.98	GEN	they grossed an estimate in subscriber money alone at about three and a half million dollars. In one month.	Big gold coin pile, a blank calendar page icon (NO digits) beside it. Text: $3,500,000	Hands on cheeks, mouth open.	Subscriber money alone, one month.
68	VO-087	3.79	GEN	And he had fewer subscribers than you are about to have.	Two vertical bars with person icons: his short, yours clearly taller. No labels, no digits.	Grin building, leaning in.	You are about to beat him.
69	VO-088-089	5.44	GEN	That is just the subscribers. You haven't even realized what else is in store for you.	Small coin pile bottom-left, rest of the screen dark with big shadowed silhouettes of coin stacks and gift boxes. No text.	Leans back smug, then a curious frown.	The subscriber money is only the first slice.
70	VO-090	4.05	GEN	Because once a crowd that size exists, the companies come next.	Crowd of person icons with a row of generic briefcase and office-building icons walking in from the edge. No text.	Head tilted, peeking at the screen.	The crowd attracts companies.

Shot	VO	Sec	Type	Line	Monitor content	Bram	Meaning / stakes
71	VO-091	5.33	GEN	One streamer showed his real numbers for one month. His name is Ludwig.	A report card with a generic stick-figure portrait, a blank calendar icon, and the name. Text: LUDWIG	Studying it, chin on hand.	A real person's real numbers.
72	VO-092a	4.46	GEN	His viewers and his streaming sites paid him over three hundred thousand dollars —	One short bar with person icon + generic website tile. Text: $300,000	Calm nod, unimpressed.	The crowd pays a modest amount.
73	VO-092b	4.45	GEN	but the brands paid him eight hundred thousand dollars.	Same short bar, now dwarfed by a tall bar with briefcase icons. Text: $300,000 and $800,000	Jaw drop, wide eyes.	The brands paid far more.
74	VO-093	4.91	GEN	The companies that want to stand next to your crowd pay more than the crowd does.	Balance scale: crowd of person icons on one pan, outweighed by briefcase/brand tiles on the other. No text.	Hand half-raised, 'wait, what?'	Companies value standing beside the crowd.
75	VO-094	5.56	GEN	And then there are the platforms themselves — the websites fighting to be the place you stream.	Three generic website tiles (different colors, no letters) pulling toward one monitor icon with tug-of-war arms. No text.	Overwhelmed, hands up.	Platforms are fighting over you.
76	VO-095a	3.88	GEN	One platform, called Mixer, reportedly paid the streamer named Ninja —	A website tile handing a big check/payment stack to a stick-figure silhouette (no bandana, no real likeness). Text: MIXER and NINJA	Eyebrows up, leaning in.	Introduce the deal.
77	VO-095b	3.88	GEN	the biggest streamer in the world at the time —	A podium with one silhouette on top, a huge crowd of tiny figures below, a globe behind. No crown. No text.	Quiet 'wow' face, brows up.	How big Ninja was.
78	VO-095c	3.89	GEN	between twenty and thirty million dollars.	Towering stacks of money. Text: $20,000,000 and $30,000,000	Eyes bulging, mouth open.	The size of the number.
79	VO-096	3.00	GEN	Just to stream on their site instead of Twitch.	Two website tiles: one labeled TWITCH faded and left behind, one glowing with the silhouette stepping across. Text: TWITCH	Shrug of disbelief.	They paid to move him.
80	VO-097-098	4.62	ASM	So add it up. Millions from the subscribers climbing on your screen.	Three coin-stack rows: subscribers (person icon, medium stack), brands (briefcase, small stack), platforms (website tile, huge stack). Row 1 lit, rows 2 and 3 dimmed. No text.	Same frame as 82 (counting fingers, impressed nod).	Row 1 of the sum.
81	VO-099	3.55	ASM	Hundreds of thousands from the brands lining up behind them.	Same screen as 82. Rows 1 and 2 lit, row 3 dimmed.	Same frame as 82.	Row 2 of the sum.
82	VO-100	3.40	GEN	Tens of millions from the platforms fighting over you.	MASTER for 80 and 81. All three rows lit, row 3 stack towering over the others.	Counting fingers, impressed nod, eyes wide (not extreme).	Row 3, the biggest number.
83	VO-101-102	5.67	GEN	That is truth number one. At number one, the money does not come from one place.	Three source icons in a row (crowd, briefcase, website tile), each with its own coin stream. No text, no digits.	Arms folded, nodding, satisfied.	Three streams, not one.
84	VO-103	3.16	GEN	It comes from everywhere — all at the same time.	Coins pouring into the screen from every edge at once. No text.	Arms out, overwhelmed delight.	Money from everywhere.
85	VO-104	2.77	GEN	Now let's uncover the hidden truth number 2.	Coins fade out; a lit crowd silhouette looks in from the dark (foreshadows Truth 2: Power). No text, no digit.	Turns toward camera, one finger up, 'next'.	Bridge to Section 4.

Credit quote

Item	Count	Cost each	Total
Paid image generations (gpt_image_2_5, 16:9, 2k, medium)	26	1.00	26.00
Free assembly states (80, 81: lit-row states cut from master 82; local compositing, no Higgsfield)	2	0.00	0.00
Voiceover (already generated), thumbnails, storyboard sheets	-	0.00	0.00
TOTAL for the 28-shot map			26.00

Balance now 825.26 (checked live). After the 26.00 base spend: 799.26.
Re-roll / fix-round reserve (NOT part of the quote, needs its own OK each time): Section 2 batch 21-30 needed 9.00 in re-rolls and 32-40 needed 4.00 in fixes, so plan for roughly 8-10 credits of re-rolls here (about 30% of shots most likely: text-heavy shots 60, 63, 67, 71, 73, 76, 78, 79).
Price basis: 1.00 per image is from STATE.md. The model lookup does not list a price, so I will get the live per-image quote at the moment of generating and stop if it differs.

Decisions for Dominick

1) Text format: '$300,000' and '$800,000' (script says 'over three hundred thousand'; no '+' added). '$3,500,000' for 'three and a half million'. '$20,000,000' and '$30,000,000' for the Mixer range. OK, or prefer different formats?
2) Names on screen: LUDWIG, NINJA, MIXER, TWITCH as plain text, all from the script. Or drop MIXER/TWITCH and use unlabeled tiles?
3) Shots 80 and 81 as free states of master 82 (same Bram frame across the three). Or generate all three separately (+2.00)?
4) Splits: 085 and 092 and 095 are cut mid-line at assembly; exact split points get set from the audio then.
